

Name _____ Date _____ Period _____

Baking Soda and Vinegar

The chemical reaction:

Procedure:

1. Place 1 tablespoon of baking soda in baggie
2. Add 20 mL of vinegar and zip up bag
3. Record observations below including what the temperature feels like.

Observations:

The reactants were (names and formulas)

The products were (names and formulas)

This reaction was
(endo / exothermic) _____

I know this because (give the evidence and tell why it happened)
