- ✓ _____
- ✓ _____

Draw surface of cube you are inferring about:

CLAIM, EVIDENCE, REASONING.

Your **claim** here is what you are inferring with the available evidence.

Your **evidence** is what you can see.

Your **reasoning** is the pattern you saw in your observations to support the evidence available to you.

Color CLAIM:

The color on the bottom of the cube should be _____.

EVIDENCE:

If the top side showed the color _____, then the bottom should show the color _____.

REASONING:

My reasoning for this is, the rest of the cube showed

_____.

Name CLAIM: The name on the bottom of the cube should be

_____.

EVIDENCE:

If the top of the cube showed the name _____ then the bottom of the cube should show the name _____.

REASONING:

My reasoning for this is, the rest of the cube showed the names

_____.

Numbers CLAIM: The numbers on the bottom surface of the cube should be _____ in the upper left and _____ in the lower right.

EVIDENCE:

The top side showed the number _____ in the upper right and _____ in the lower left then, the bottom surface of the cube should show the number _____ in the top right, and the number _____ in the lower left.

REASONING:

My reasoning for this is, the rest of the cube showed

_____.
